Wattly Group and Ocorian announce Strategic partnership to launch €100 Million European energy infrastructure fund

Today marks an important milestone in the continued growth of Wattly Group.

We are proud to announce that Wattly Group and Ocorian have entered into a strategic partnership to launch a European Energy Infrastructure Fund, targeting €100 million and structured as an Article 9 fund under the EU Sustainable Finance Disclosure Regulation (SFDR).

By combining Ocorian's expertise in institutional fund administration and management with Wattly Group's infrastructure intelligence and the GreenBridge 360 platform, the partnership aims to create new opportunities for institutional investment in Europe's energy infrastructure sector.

For Wattly Group, this partnership represents more than the launch of a single investment fund. It marks an important step in our long-term ambition to build an institutional investment platform supporting the development, financing and transformation of Europe's energy infrastructure.

As demand for energy infrastructure continues to grow across Europe, we believe that bringing together institutional capital, infrastructure expertise and technology will play an increasingly important role in accelerating the energy transition.

About Ocorian

Ocorian is a global provider of financial, corporate and fund administration services, supporting asset managers, financial institutions, corporations, family offices and high-net-worth individuals.

Founded in 1971, Ocorian has grown into an international business with more than 2,000 employees, over 9,000 clients and operations across more than 20 locations worldwide.

We are excited to embark on this partnership with Ocorian and look forward to building a long-term collaboration that contributes to the future of Europe's energy infrastructure.

This is just the beginning.
